## E-Commerce Solutions

At Sijison Inc, we have experienced professionals with extensive expertise in the daily operations of an online business, from a small company to corporate level. Through an extensive analysis of not just your business, but your competitors' businesses and the current business environment, we will build a strategic plan that will match your strengths to maximize market opportunities, while minimizing any risks and capitalizing on your competitors weaknesses' or voids.

We combine all of our strengths and experience to build a secure e-Commerce solution custom-tailored to your company's needs and budget, to ensure your time to see a return on investment is kept as short as possible. Each solution is built to be easy to operate with a web based content management system that makes updates inexpensive and fast.

We use a proven process to ensure your e-Commerce solution is secure, robust, and user-friendly.

Our expertise includes:

- Secure Payments and Payment Processing
- HTTPS/SSL encryption and support
- Secure Hosting and e-Mail
- Back-End Integration
- Order Tracking
- Affiliate Programs
- Market and Sales Analysis
- Search Engine Promotion and Marketing
- Dynamically-Generated Pages indexable by all search engines
- Content Management Systems

E-Commerce shopping cart solutions make it simple for your customers to conveniently shop online for your products, place and pay for their orders, and arrange for fast and convenient delivery.

Today's online businesses demand robust security, browser-based inventories and shopping cart management, and secure credit card processing.

Sijison Inc can implement standard e-commerce solutions combined with full content management abilities or fully customize your website to meet your business needs. Whether you are upgrading an existing online store, opening a new store, or expanding

**Browser Managed** – Web-based “admin” panel lets multiple users make changes to your website from any location, 7 days a week.

**Reporting** – The system can create reports on a variety of sales and inventory issues, such as sales by customer, product sold, sales by territory, or sales within a specific date range. Customized reports on just about any aspect of your business can be created, and our inventory tracking program is seamless.

**Store Administration Maintenance** – Easily add, modify or delete your products, individually, by categories, and/or by subcategories. Add or remove images, change prices, announce specials. Out-of-stock items are automatically flagged.

**Scalability** – Our e-commerce solutions are flexible to meet your future demands, so that that as your business grows, your website capabilities will be able to grow with your business, letting you keep up with the future demands of web-based commerce.
